[SHOWREELFINDER](#)

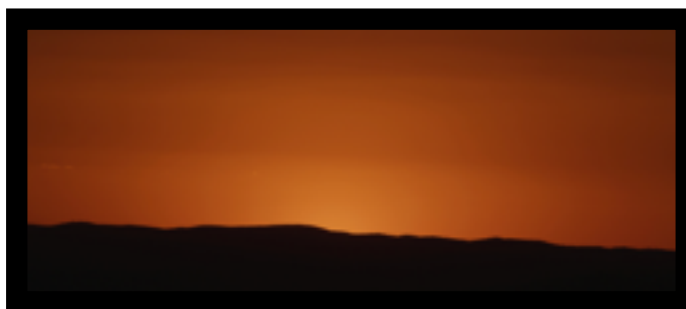

As a DOP with over 20 years experience in the business I know how important it is to have good gear and I pride myself on having some of the most exceptional equipment around including my own EPIC X 5K cinema camera, the Sony F5, the Ronin stabilisation gimbal and an array of supreme Canon and Zeiss lens kits.

[See the complete list here](#)

In recent years I've spent a lot time working primarily on longer form television productions both in Australia and overseas, I've also been lucky to have the freedom to be able work on a diverse range of smaller scale personal projects, all of which have given me creative flexibility and the opportunity to produce what I think is some beautiful results.

For a look at some of my recent completed works at the link [here](#)
Over the years my work has been recognised both locally and nationally with ACS awards in categories such as music videos, TVC's, new media and short films.
